Save your skin with AfterBURN

AfterBURN Sunburn Rescue Gel is a revolutionary product to help soothe and repair sun damaged skin, unlike traditional after sun products that simply moisturise.

AfterBURN Sunburn Rescue Gel is a unique dermatological gel with an osmotic action that draws water from within the skin (the dermis) to the surface (the epidermis), helping to rehydrate and treat sun-damaged skin.

The gel is odourless, non-sticky and non-staining, is rapidly absorbed and acts quickly on the skin. It contains no alcohol, added preservatives or colourings and helps to reduce the chances of premature skin ageing and redness of the skin as well as cooling irritation and easing discomfort.

Available from Boots and other pharmacies and leading retailers nationwide, AfterBURN Sunburn Rescue Gel is priced at £9.78 for 75g.
